Notes:

(1) Further detailed information could be found in the common reporting format tables of the Party's greenhouse gas inventory, namely "Emission trends (CO₂)", "Emission trends (CH₄)", "Emission trends (N₂O)" and "Emission trends (HFCs, PFCs and SF₆)", which is included in an annex to this biennial report.

(2) 2011 is the latest reported inventory year.

(3) 1 kt CO₂ eq equals 1 Gg CO₂ eq.

Abbreviation: LULUCF = land use, land-use change and forestry.

^a The column "Base year" should be filled in only by those Parties with economies in transition that use a base year different from 1990 in accordance with the relevant decisions of the Conference of the Parties. For these Parties, this different base year is used to calculate the percentage change in the final column of this table.

^b Includes net CO₂, CH₄ and N₂O from LULUCF.

Abbreviations: CRF = common reporting format, LULUCF = land use, land-use change and forestry.

^a The column "Base year" should be filled in only by those Parties with economies in transition that use a base year different from 1990 in accordance with the relevant decisions of the Conference of the Parties. For these Parties, this different base year is used to calculate the percentage change in the final column of this table.

^b Fill in net emissions/removals as reported in CRF table Summary 1.A of the latest reported inventory year. For the purposes of reporting, the signs for removals are always negative (-) and for emissions positive (+).

CO₂ emissions from biomass							
CO₂ captured							
Long-term storage of C in waste disposal sites							
Indirect N₂O							
Indirect CO₂ (3)							

Abbreviations : CRF = common reporting format, LULUCF = land use, land-use change and f

^a The column "Base year" should be filled in only by those Parties with economies in transition that use a base year different from 1990 in accordance with the relevant decisions of the Conference of the Parties. For these Parties, this different base year is used to calculate the percentage change in the final column of this table.

Abbreviations: CRF = common reporting format, LULUCF = land use, land-use change and forestry.

^a The column "Base year" should be filled in only by those Parties with economies in transition that use a base year different from 1990 in accordance with the relevant decisions of the Conference of the Parties. For these Parties, this different base year is used to calculate the percentage change in the final column of this table.

^cEnter actual emissions estimates. If only potential emissions estimates are available, these should be reported in this table and an indication for this be provided in the documentation box. Only in these rows are the emissions expressed as CO₂ equivalent emissions.

^dIn accordance with the "Guidelines for the preparation of national communications by Parties included in Annex I to the Convention, Part I: UNFCCC reporting guidelines on annual inventories", HFC and PFC emissions should be reported for each relevant chemical. However, if it is not possible to report values for each chemical (i.e. mixtures, confidential data, lack of disaggregation), this row could be used for reporting aggregate figures for HFCs and PFCs, respectively. Note that the unit used for this row is kt of CO₂ equivalent and that appropriate notation keys should be entered in the cells for the individual chemicals.)

Table 2(a)

BEL_BR2_v1.0

Description of quantified economy-wide emission reduction target: base year^a

<i>Party</i>	<i>Belgium</i>	
Base year /base period	1990	
Emission reduction target	% of base year/base period	% of 1990 ^b
	20.00	
Period for reaching target	BY-2020	

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b Optional.

Description of quantified economy-wide emission reduction target: gases and sectors covered^a

<i>Gases covered</i>		<i>Base year for each gas (year):</i>	
CO ₂		1990	
CH ₄		1990	
N ₂ O		1990	
HFCs		1995	
PFCs		1995	
SF ₆		1995	
NF ₃		1995	
Other Gases (specify)			
Sectors covered ^b	Energy	Yes	
	Transport ^f	Yes	
	Industrial processes ^g	Yes	
	Agriculture	Yes	
	LULUCF	No	
	Waste	Yes	
	Other Sectors (specify)		
	Aviation in the scope of the EU-ETS	No	

Abbreviations : LULUCF = land use, land-use change and forestry.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b More than one selection will be allowed. If Parties use sectors other than those indicated above, the explanation of how these sectors relate to the sectors defined by the IPCC should be provided.

^f Transport is reported as a subsector of the energy sector.

^g Industrial processes refer to the industrial processes and solvent and other product use sectors.

Description of quantified economy-wide emission reduction target: global warming potential values (GWP)^a

<i>Gases</i>	<i>GWP values^b</i>
CO ₂	4th AR
CH ₄	4th AR
N ₂ O	4th AR
HFCs	4th AR
PFCs	4th AR
SF ₆	4th AR
NF ₃	4th AR
Other Gases (specify)	

Abbreviations : GWP = global warming potential

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b Please specify the reference for the GWP: Second Assessment Report of the Intergovernmental Panel on Climate Change (IPCC) or the Fourth Assessment Report of the IPCC.

Description of quantified economy-wide emission reduction target: approach to counting emissions and removals from the LULUCF sector^a

Role of LULUCF	LULUCF in base year level and target	Excluded
	Contribution of LULUCF is calculated using	

Abbreviation : LULUCF = land use, land-use change and forestry.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

Description of quantified economy-wide emission reduction target: market-based mechanisms under the Convention^a

<i>Market-based mechanisms under the Convention</i>	<i>Possible scale of contributions (estimated kt CO₂ eq)</i>
CERs	
ERUs	
AAUs ⁱ	
Carry-over units ^j	
Other mechanism units under the Convention (specify) ^d	

Abbreviations : AAU = assigned amount unit, CER = certified emission reduction, ERU = emission reduction unit.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^d As indicated in paragraph 5(e) of the guidelines contained in annex I of decision 2/CP.17 .

ⁱ AAUs issued to or purchased by a Party.

^j Units carried over from the first to the second commitment periods of the Kyoto Protocol, as described in decision 13/CMP.1 and consistent with decision 1/CMP.8.

Description of quantified economy-wide emission reduction target: other market-based mechanisms^a

<i>Other market-based mechanisms</i>	<i>Possible scale of contributions</i>
<i>(Specify)</i>	<i>(estimated kt CO₂ eq)</i>

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudge the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

Description of quantified economy-wide emission reduction target: any other information^{a,b}

In December 2009, the European Council reiterated the conditional offer of the EU to move to a 30% reduction by 2020 compared to 1990 levels as part of a global and comprehensive agreement for the period beyond 2012, provided that other developed countries commit themselves to comparable emission reductions and that developing countries contribute adequately according to their responsibilities and respective capabilities.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b This information could include information on the domestic legal status of the target or the total assigned amount of emission units for the period for reaching a target. Some of this information is presented in the narrative part of the biennial report.

Custom Footnotes

Legally binding target trajectories for the period 2013-2020 are enshrined in both the EU-ETS Directive (Directive 2003/87/EC and respective amendments) and the Effort Sharing Decision (Decision No 406/2009/EC). These legally binding trajectories not only result in a 20% GHG reduction in 2020 compared to 1990 but also define the EU's annual target pathway to reduce EU GHG emissions from 2013 to 2020. The Effort Sharing Decision sets annual national emission targets for all Member States for the period 2013-2020 for those sectors not covered by the EU emissions trading system (ETS), expressed as percentage changes from 2005 levels. In March 2013, the Commission formally adopted the national annual limits throughout the period for each Member State. By 2020, the national targets will collectively deliver a reduction of around 10% in total EU emissions from the sectors covered compared with 2005 levels. The emission reduction to be achieved from the sectors covered by the EU ETS will be 21% below 2005 emission levels.

In principle, the EU ETS should cover CO₂ emissions of all flights arriving at, and departing from, airports in all EU Member States, Norway, Iceland and Liechtenstein and closely related territories. However, since 2012, flights to and from airports from other countries have not been included in the EU ETS. This exclusion was taken in order to facilitate negotiation of a global agreement to address aviation emissions in the forum of the International Civil Aviation Organisation (ICAO). The EU has decided on a reduced scope in the 2013–2016 period (EU, 2014c).

The EU pledge does not include emissions/removals from Land Use, Land-Use Change and Forestry to deliver its firm independent commitment to reduce greenhouse gas emissions by at least 20 % compared to 1990 by 2020. The EU LULUCF sector is however estimated to be a net sink over that period.

The 2020 Climate and Energy Package allows Certified Emission Reductions (CERs) and Emission Reduction Units (ERUs) to be used for compliance purposes, subject to a number of restrictions in terms of origin and type of project and up to an established limit. In addition, the legislation foresees the possible recognition of units from new market mechanisms. Under the EU ETS, the limit does not exceed 50% of the required reduction below 2005 levels. In the sectors not covered by the ETS, annual use must not exceed to 3 % of each Member States' non-ETS greenhouse gas emissions in 2005. Belgium may use an additional 1%, from projects in LDCs or SIDS subject to conditions.

The use of these units under the ETS Directive and the Effort Sharing Decision is subject to the limits specified above which do not distinguish between CERs and ERUs, but include additional criteria for the use of CERs.

The use of these units under the ETS Directive and the Effort Sharing Decision is subject to the limits specified above which do not distinguish between CERs and ERUs, but include additional criteria for the use of CERs.

AAUs for the period 2013-2020 have not yet been determined. The EU expects to achieve its 20% target for the period 2013-2020 with the implementation of the ETS Directive and the ESD Decision in the non-ETS sectors, which do not allow the use of AAUs from non-EU Parties.

At CMP.9 the EU made a declaration, when adopting the Doha amendment of the Kyoto Protocol, that the European Union legislation on 2020 Climate and Energy Package for the implementation of its emission reduction objectives for the period 2013-2020 does not allow the use of surplus AAUs carried over from the first commitment period to meet these objectives.

There are general provisions in place in the EU legislation that allow for the use of such units provided that the necessary legal arrangements for the creation of such units have been put in place in the EU, which was not the case when this report was provided.

None. Belgium does not recognize the use of market-based mechanisms other than those under the Convention for the achievements of quantified economy-wide emission reduction targets

Table 3

BEL_BR2_v1.0

Progress in achievement of the quantified economy-wide emission reduction target: information on mitigation actions and their effects

Name of mitigation action ^a	Sector(s) affected ^b	GHG(s) affected	Objective and/or activity affected	Type of instrument ^c	Status of implementation ^d	Brief description ^e	Start year of implementation	Implementing entity or entities	Estimate of mitigation impact (not cumulative, in kt CO ₂ eq)	
EP-A01 : Green and/or CHP certificates*	Energy	CO ₂	increase in renewable energy;other (increase in HP - CHP capacity)	Economic	Implemented	Regional level : Principle of a system of green certificates : 1. A green certificate is allocated to a producer of green electricity every time its production avoids the emission of a fixed amount of CO ₂ , if it had to be produced in a reference fossil fuel plant (natural gas CCGT). 2. Each year, a predefined (and annually increasing) percentage of electricity supplied to end users has to be covered by green electricity. Suppliers must reconstitute the necessary number of green certificates to demonstrate that they respect that rule. In case of failure, a penalty fee is due. This situation creates a market for green certificates for the benefit of green electricity producers. In Flanders, a similar process is established for CHP, while CHP is integrated in the green certificates system in Brussels and Wallonia. Green certificates and CHP certificates : share of electricity sales to be covered by RES and/or high efficiency CHP. Guaranteed minimum income for suppliers of green energy. Shares are regularly updated by regional regulation authorities. Federal authority : (offshore windfarms; see also EP-A05) 1. A green certificate is an immaterial good certifying that a producer produced a given amount of green electricity (ie. produced from renewable energy sources) during a given period of time 2. There is a legal obligation for the transmission network operator (TSO) to buy all green certificates granted to the holders of a domain concession and originating from offshore wind energy production. The obligation	2004	FED : Economy, SMEs, Self-Employed and Energy FPS - DG Energy (E2) Flanders: VEA, VREG Wallonia: CWAPE Brussels: IBGE, Brugel		4526
EP-A02 : Support for electricity production from RES*	Energy	CO ₂	Increase electricity production from RES and CHP	Other (Economic)	Implemented	Financial support for electricity generation from RES through subsidies	2004	FED : Economy, SMEs, Self-Employed and Energy FPS - DG Energy (E2) Flanders: VEA, VREG Wallonia : DG04 Energy & DG06 Economy Brussels: IBGE, Sibelga		2420

Table 3

Progress in achievement of the quantified economy-wide emission reduction target: information on mitigation actions and their effects

Name of mitigation action ^a	Sector(s) affected ^b	GHG(s) affected	Objective and/or activity affected	Type of instrument ^c	Status of implementation ^d	Brief description ^e	Start year of implementation	Implementing entity or entities	Estimate of mitigation impact (not cumulative, in kt CO ₂ eq)	
EP-A03 : End of tax exemption on coal and heavy fuel*	Energy	CO ₂	Discourage the use of coal and heavy fuel in power plants; increase electricity production from RES and CHP	Fiscal	Implemented	Exemption from excise has been suppressed & an excise duty on energy for coal and heavy fuel oil products has been established As of 1 January 2015, all excise duties on energy products and electricity have slightly increased	2004	FED : Finance FPS		Impact included in EP-A02
EP-A04 : Facilitators services for RES and CHP promotion*	Energy	CO ₂	Increase of RES and high efficiency CHP	Information	Implemented	Facilitators perform promotional actions and provide guidance and technical support to projects holders. They also identify technical and non technical barriers and formulate proposals to lift them. Facilitators exist for each RES technology (windmills, biomethanisation, wood energy, biofuels, mini hydro-electricity, PV electricity, ... as well as for CHP	2004	Flanders: VEA Brussels: IBGE Wallonia : DG04 Energy		Impact included in EP-A01
EP-A05 : Action plan for RES and CHP*	Energy	CO ₂	Development of biomass/off-shore wind energy /CHP	Economic	Implemented	Action Plan for renewable energy and CHP. This PaM gathers various plans to promote electricity from RES. The major plan is the development of a large offshore wind farm in the North Sea, aiming at a total capacity of 2 200 MW. Other plans concern notably on-shore windfarms, (micro) CHP, generation of green heat, use of residual heat and encouragement of heat networks.	2004	FED : Economy, SMEs, Self-Employed and Energy FPS - DG Energy (E2) Flanders : VEA Wallonia : DGO4 Energy		2539
EP-B01 : ETS : specific policy for quota allocation to electricity producers*	Energy	CO ₂	Efficiency improvement in the energy and transformation sector and promotion of electricity production using RES	Economic	Implemented	Specific improvement for allocation of emission quotas to power plants. The measure expired when electricity producers relied exclusively on the market for their quotas	2004	Health, Food Chain Safety and Environment FPS - DG Environment (register) Flanders: VEA, LNE Brussels: IBGE Wallonia : AwAC		Impact included in EP-A01
EP-B02 : Energy planning by electricity producers*	Energy	CO ₂	Energy efficiency improvement and GHG emission reductions in the electricity production sector.	Other (Other (planning))	Implemented	In the Flemish Region, the Energy Planning Decision imposes energy-efficiency requirements on establishments with a total annual primary energy consumption of at least 0.1 PJ. The electricity sector is included in this regulation	2004	Flanders: VEA		NE

Table 3

EC-A01 : Promotion of rational use of energy by electricity distribution companies as part of their public service obligation*	Energy	CO ₂	Energy efficiency improvement in buildings	Economic	Implemented	In Flanders, the electricity distribution network operators manage a compulsory programme promoting RUE among customers. The programme is featuring information, demonstrations, various energy services and financial supports for actions and improvements. Operators are required to pay special attention to disadvantaged social groups. Higher grants are provided for combined insulation projects.	2004	Flanders: VEA Brussels: IBGE, Sibelga		Impact partly included in EC-B01
EC-A02 : Mobilizing the resources of the natural gas fund*	Energy	CO ₂	Rational use of energy, extension of natural gas network and security actions	Economic	Implemented	An initial fund managed by natural gas distribution companies, it has now been re-allocated to the Regions for RUE actions, extension of the gas network and security actions.	2004	Flanders: VEA Brussels: Sibelga		Impact included in EC-B01
EC-A03 : Energy performance and certificate of buildings*	Energy	CO ₂	efficiency improvement in buildings	Regulatory	Implemented	Energy performance and certification of buildings (legal and methodological aspects): actions taken in order to transpose the directive including development of the methodology needed to quantify regulations for new buildings and the performance of existing buildings for certification. Brussels : The implementation of the directive is done in RBC by the "PLAGE Ordinance". The previously voluntary PLAGE become mandatory for certain category of buildings. Audits are mandatory every 4 years for industries.	2004	Flanders: VEA Wallonia: DGO4 Energy Brussels: IBGE		278
EC-A04 : Appointment of accredited energy experts*	Energy	CO ₂	efficiency improvement in buildings; demand management/reduction	Regulatory	Implemented	Accreditation of energy experts based on specific criteria to guarantee their expertise	2004	Flanders: VEA Brussels: IBGE		NE

Table 3

EC-B01 : Financial support to RUE and RES in the residential sector*	Energy	CO ₂	efficiency improvement in buildings	Other (Fiscal)	Implemented	<p>Financial incentives for the rational use of energy (RUE) and RES : combination of regional subsidies and federal tax deduction for investments generating energy savings. Covers most of equipment such as wall insulation, high performance double glazing, condensing boilers, heating systems regulations, efficient hot water heaters and heat pumps.</p> <p>In Wallonia, application for subsidies can be submitted directly or through the "Alliance for Employment and Environment", proposing conventions between house owners and the authority : individuals commit to realize a package of investments (minimum one action on the building envelope and one on the heating/SHW system) and authorities provide subsidies and offer a 0% interest loan to cover the additional expense. Still in Wallonia, energy subsidies have merged with households rehabilitation/renovation mechanisms and their level of support varies with the income of owners.</p> <p>In Flanders important financial incentives are given through the public service obligations concerning rational use of energy for electricity distribution network operators (EC-A01). On top of the grants from the network operators a renovation grant is awarded for certain energy-related investments. in addition, the property tax for energy efficient newbuilds is automatically lowered if the newbuild outperforms the prevailing requirements.</p> <p>The Federal tax deduction was discontinued in January 2012, except for roof insulation (albeit at a lower rate). This last tax deduction mechanism is now transferred to the Regions</p>	2004	FED : Finance FPS Flanders: VEA Wallonia : DGO4 Energy Brussels: IBGE, Sibelga		3525
EC-B02 : Efficiency and emission regulation for boilers and stoves in the residential sector*	Energy	CO ₂	efficiency improvement of appliances	Regulatory	Implemented	<p>Specific constraints on solid fuel, gas and liquid fuel boilers and stoves: standards on CO, PM and NOx emissions and energy efficiency. Periodic maintenance of central heating boilers (every one or two years depending on the system) and a periodic audit of the central heating system by a certified technician is obliged for home owners/users.</p>	2005	FED : Health, Food Chain Safety and Environment FPS - DG Environment Flanders: VEA, LNE		Impact included in EC-B01

Table 3

Name of mitigation action ^a	Sector(s) affected ^b	GHG(s) affected	Objective and/or activity affected	Type of instrument ^c	Status of implementation ^d	Brief description ^e	Start year of implementation	Implementing entity or entities	Estimate of mitigation impact (not cumulative, in kt CO ₂ eq)	
EC-B03 : Specific support for RUE initiatives for people with low incomes	Energy	CO ₂	efficiency improvement in buildings; demand management/reduction	Economic	Implemented	Specific RUE aid for unprivileged people, who do not pay tax and thus may not benefit from tax exemptions. Since tax exemptions for RUE investments were suppressed, such mechanisms are no more in application	2004	Flanders: VEA Brussels: IBGE, AATL Wallonia : DG04 Energy		12
EC-B04 : Improvement of consumer information on the environmental impact of products*	Energy	CO ₂	efficiency improvement in buildings; demand management/reduction	Information	Implemented	Improving information available to consumers to promote products with low environmental impacts	2004	FED : Health, Food Chain Safety and Environment FPS - DG Environment Economy, SMEs, Self-Employed and Energy FPS - DG Energy (E2)		NE
EC-B05 : Energy performance of buildings (residential sector)*	Energy	CO ₂	efficiency improvement in buildings; demand management/reduction	Regulatory	Implemented	Transposing the energy performance of buildings directive for the residential sector Imposition of energy requirements (Energy Performance Decree standard) to homes and apartments Flanders: the requirements for new buildings and full renovations are tightened step by step so as to reach nearly energy neutral new buildings in 2021. The information on the energy certificates of buildings is gradually expanded so as to better inform (potential) owners and users of buildings. In addition, the Flemish Housing Code (which every home - new and existing - in Flanders is required to satisfy) will impose minimal energy performance requirements (such as an obligation to have roof insulation). Wallonia : same procedure, however only recent stages have been officially decided. Brussels Capital Region: The Government's decree of 21 December 2007 on EPB stipulates that new buildings have to be passive and heavily renovated ones very low energy starting in 2015.	2004	Flanders: VEA Wallonia : DG04 Energy Brussels: IBGE	Impact included in EC-A03	
EC-B05 bis : Energy performance and certification of buildings (residential)	Energy	CO ₂	Efficiency improvement in buildings; demand management/reduction	Regulatory	Planned	Additional steps in the energy performance of buildings (partim residential sector): Flanders: stricter requirements Wallonia: completing application schedule up to 2020	2004	Flanders: VEA Wallonia: DG04 Energy Brussels: IBGE		52

EC-C05 : Financial support for sustainable energy policies in sheltered and social workshops *	Energy	CO ₂	RUE in sheltered and social workshops	Economic	Implemented	Flanders: Specific financial mechanisms to protect low-income populations	2004	Flanders: WSE		Impact included in EC-B01
IP-A01 : Implementation of the ETS in the industrial sector*	Industry/industrial processes	CO ₂	Efficiency improvement in industrial end-use sectors	Regulatory	Implemented	Belgian National Allocation Plans 2005-2007 & 2008-2012 European system on scope 2013-2020. The implementation of the measure is limited to the management of the system on the territory (at industry level)	2004	Flanders: LNE Wallonia: AwAC Brussels: IBGE		Impact included in IP-A02
IP-A02 : Long-term Energy/CO ₂ efficiency agreements in the industrial sector*	Industry/industrial processes	CO ₂	Efficiency improvement in industrial end-use sectors	Voluntary Agreement	Implemented	Flanders: Benchmarking and voluntary agreements through contracts signed with public authorities. Enterprises (directly or through their professional association) make a voluntary commitment to improve their energy efficiency within a certain time horizon. Targets are quantified by benchmarking (within 10% of the best performer) or by energy audit, considering all RUE investments which have an IRR of 12.5%. The audit- and benchmarking agreements expired on 31/12/2014 and were superseded by the energy policy agreement (IP-A02 bis). Wallonia: All voluntary agreements are established on the basis of energy audit conventions, with objectives for 2012. Most industrial sectors are involved. Objectives are fixed on the basis of the audit results, considering all energy saving or CO ₂ reduction measures considered feasible and presenting a payback time of up to 4 years.	2004	Flanders: VEA Wallonia: DGO4 Energy Brussels: IBGE Industrial associations		2627

IP-A02 bis: Long-term Energy/CO ₂ efficiency agreements in the industrial sector *	Industry/industrial processes	CO ₂	Efficiency improvement in industrial end-use sectors	Voluntary Agreement	Implemented	<p>In Flanders: energy intensive companies with a total annual primary energy consumption of at least 0.1 PJ are encouraged to further reduce their energy consumption by signing the energy policy agreement with the Flanders Government. Enterprises (directly or through their professional association) make a voluntary commitment to draft an energy plan, implement all economically viable RUE investments, and conduct a study on the potential for CHP, and heat and cold networks. For non-ETS companies economically viable investments are defined as investments that have an IRR of 12.5%. The IRR of investments with an IRR between 10% and 12.5% needs to be recalculated every year. For ETS companies, economically viable investments are defined as investments that have an IRR of 14%. The IRR of investments with an IRR between 10% and 14% needs to be recalculated every year.</p> <p>In Wallonia: agreements are prolonged until 2020, based now on investments presenting a payback time of up to 5 years. Additional commitments for industries are the establishment of a CO₂ mapping of their activities (carbon balance of the site or GHG life cycle analysis of main products) and feasibility study of potential RES implementation on the industrial site. Each federation must establish an energy/GHG roadmap to 2050.</p>	2014 (WL) 2015 (VL)	Flanders: VEA Wallonia: DGO4 Energy Brussels: IBGE Industrial associations		Impact included in IP-A02
IP-A03: Energy planning in industries*	Industry/industrial processes	CO ₂	Efficiency improvement in industrial end-use sectors	Regulatory	Implemented	In the Flemish Region, the Energy Planning Decision imposes energy-efficiency requirements on establishments with a total annual primary energy consumption of at least 0.1 PJ.	2004	Flanders: VEA		Impact included in IP-A02
IP-A04: Reference Centres and industrial "clusters"*	Industry/industrial processes	CO ₂	Demand management/reduction	Other (other)	Implemented	Creating clustered structures to induce synergies among enterprises involved in energy technologies	2004	Flanders: VEA Wallonia: DGO6 Economy Brussels: IBGE		NE

Progress in achievement of the quantified economy-wide emission reduction target: information on mitigation actions and their effects

Name of mitigation action ^a	Sector(s) affected ^b	GHG(s) affected	Objective and/or activity affected	Type of instrument ^c	Status of implementation ^d	Brief description ^e	Start year of implementation	Implementing entity or entities	Estimate of mitigation impact (not cumulative, in kt CO ₂ eq)	
TR-B01: Promotion of car-pooling*	Transport	CO ₂	Improved behaviour	Regulatory Economic Information	Implemented	<ul style="list-style-type: none"> "- Changing the rules of the road, allowing road managers to open a road lane reserved for buses, cars occupied by several people, vehicles used for the transportation company (journey to work). - Extension of Liability (Compulsory Insurance) coverage for carpools. - Insurance for work accidents (mandatory for companies) indemnify the incapacity of the driver and passengers. The journey to work required may include a visit to the collection of car-poolers. - The compensation paid by the employer for the journey to work is not taxable. - The driver can deduct EUR 0.15/km from taxes without having to declare the compensation paid by car-poolers. - Carpooling is being supported fiscally. Home-work travel expenses for using carpooling are deductible as the lump sum rate of 0.€15/km, up to a maximum distance of 25 km (later increased to 50 and 100 km one-way). Flanders: <ul style="list-style-type: none"> - Stimulation of carpooling - Constructing carpool parking areas 	2004 (2002 for tax deductions)	FED: Finance FPS Mobility and Transport FPS Flanders: MOW		10.5
TR-B02: Promotion of car sharing*	Transport	CO ₂	Improved behaviour	Other (Planning)	Implemented	Promotion of car-sharing The railway company participates in the organisation of shared cars (type Cambio) by reserving parking places for cars shared close to railway stations.	2004	Brussels: IBGE Flanders: Mow BE railway		0.8
TR-B03: Promotion of teleworking*	Transport	CO ₂	Demand management/reduction	Regulatory	Implemented	Promoting teleworking	2004	FED: Personnel and Organisation FPS		NE

Table 3

BEL_BR2_v1.0

Progress in achievement of the quantified economy-wide emission reduction target: information on mitigation actions and their effects

Name of mitigation action ^a	Sector(s) affected ^b	GHG(s) affected	Objective and/or activity affected	Type of instrument ^c	Status of implementation ^d	Brief description ^e	Start year of implementation	Implementing entity or entities	Estimate of mitigation impact (not cumulative, in kt CO ₂ eq)	
TR-B04: Improve freight transport efficiency*	Transport	CO ₂	Improved behaviour	Voluntary Agreement	Implemented	Optimising timetables, loading and unloading procedures and the logistics of freight transport by road, logistics consultants to help companies make a modal shift, development of support tools (such as roadmap for green logistics, simulation model to optimise the time of good flows, best practices in relation to green logistics, etc.), improvement of manufacture to consumer distribution (including last mile distribution), stimulation of initiatives for green logistics/return logistics, etc.	2004	Brussels: Port de Bruxelles Flanders: MOW		NE
TR-B05: Eco-driving*	Transport	CO ₂	Improved behaviour	Other (Information)	Implemented	The measure is now regional Flanders: - Extending Flemish government training courses to include economical driving - Eco-driving training for all public transport bus drivers and instructors - Equipping public transport busses with driving style meters - Awareness raising campaigns about the vehicle parameters that affect emissions (load, tires, etc.) and eco-driving	2004	FED: Mobility and Transport FPS Wallonia: TEC Brussels: STIB Flanders: De Lijn, MOW, LNE		107
TR-C01: Tax deductions for the purchase of new clean vehicles*	Transport	CO ₂	Efficiency improvements of vehicles	Fiscal	Implemented	Tax deduction when purchasing clean vehicles: Automatic reduction for purchases by individuals was discontinued in January 2012. A recalculation of the benefit in kind was introduced for company cars. Until end 2012, financial help for the purchase of an electric vehicle (limited to EUR 9 190).	2004	FED: Finance FPS + Mobility and Transport FPS + Health, Food Chain Safety and Environment FPS - DG Environment		11.6
TR-C02: Promoting the purchase of clean vehicles *	Transport	CO ₂	Efficiency improvements of vehicles	Information	Implemented	Promoting the purchase of clean vehicles by advertising CO ₂ emissions controlled and annual publication containing information on CO ₂ emissions of all new vehicles on the Belgian market and identifying clean vehicles eligible for tax deduction. Bonuses and penalties exist in the Walloon system for buying a private vehicle according to CO ₂ emissions for both new and used cars. The mechanism is now reduced to penalties	2004	FED: Mobility and Transport FPS Wallonia DGO2 Budget		Impact included in TR-C01

Progress in achievement of the quantified economy-wide emission reduction target: information on mitigation actions and their effects

Name of mitigation action ^a	Sector(s) affected ^b	GHG(s) affected	Objective and/or activity affected	Type of instrument ^c	Status of implementation ^d	Brief description ^e	Start year of implementation	Implementing entity or entities	Estimate of mitigation impact (not cumulative, in kt CO ₂ eq)	
TR-C03: Vehicles' environmental impacts appraisal (ECOSCORE) and changes to taxes*	Transport	CO ₂	Efficiency improvements of vehicles	Fiscal	Implemented	Environmental Impact Assessment of vehicles, reformation of the road fund tax and the tax on entry into service (ECOSCORE)	2004	Wallonia: AwAC Brussels: IBGE Flanders: LNE		Impact included in TR-C01
TR-C04: Specific support for the construction of clean vehicles*	Transport	CO ₂	Efficiency improvements of vehicles	Research	Implemented	Specific support for the construction of clean vehicles	2004	Wallonia: DGO6 Economy		NE
TR-C05: Best available technology for public transport*	Transport	CO ₂	Efficiency improvements of vehicles	Regulatory	Implemented	Purchase of clean vehicles for public transport	2004	Wallonia: TEC Brussels: STIB Flanders: De Lijn		NE
TR-D01: Promoting biofuels*	Transport	CO ₂	Low carbon fuels/electric cars	Regulatory	Implemented	1. Mandatory blending of sustainable biofuels 2. Possibility to put non-standardised biofuels on the market	2004	FED: Health, Food Chain Safety and Environment FPS - DG Environment + Economy, SMEs, Self-Employed and Energy FPS - DG Energy (E2)		1431
AG-A01 : Reducing emissions from cultivation that uses greenhouses (glasshouses)*	Agriculture, Forestry/LULUC F	CO ₂	Efficiency improvement in services/tertiary sector	Other (Information)	Implemented	Subsidies, information, promotion of CHP and HP, investigation of available residual energy/CO ₂ from industry to be recycled in greenhouses. In the Walloon Region, a subsidy is available to support the design of high efficiency greenhouses. In Flanders, various policy instruments will continue to stimulate energy saving and sustainable and renewable energy production and consumption. These include financial support for energy saving techniques and investments in renewable energy, advice on the rational use of energy in permits, awareness raising, technological service, etc. Additionally, the energy consultant project will be strengthened and a pilot project will be supported in which low-value residual heat from waste incinerators is used to heat (and possibly CO ₂ -fertilise) clustered greenhouses.	2004	Wallonia: DGO4 Energy Flanders: LV, VEA		NE

Table 3

Progress in achievement of the quantified economy-wide emission reduction target: information on mitigation actions and their effects

Name of mitigation action ^a	Sector(s) affected ^b	GHG(s) affected	Objective and/or activity affected	Type of instrument ^c	Status of implementation ^d	Brief description ^e	Start year of implementation	Implementing entity or entities	Estimate of mitigation impact (not cumulative, in kt CO ₂ eq)	
AG-A02: Financial incentives for rational use of energy in agriculture *	Agriculture, Forestry/LULUC F	CO ₂	Efficiency improvement in services/tertiary sector	Economic	Implemented	Financial instruments available for RUE and RES in the private sectors are also made available for agriculture. Moreover, specific financial instruments exist in Flanders for the agriculture sector (see also AG-A01)	2004	Energy administration + Flanders also LV		NE
AG-B01: Reduction of GHG emissions from fertilisers and manure usage*	Agriculture, Forestry/LULUC F	N ₂ O, CH ₄	Reduction of fertiliser/manure used on cropland; improved livestock management	Information Economic Regulatory	Implemented	Rural development plans are supplemented by specific measures on the rational use of organic and nitrogen-based fertilisers. Such policies, initially aimed at reducing the stress of pollution on surface and underground waters, contribute to the reduction of N ₂ O and CH ₄ emissions. Reductions in livestock sizes are also expected and should also contribute to emissions reductions. Moreover, cross compliance regulations aim to protect pastures: prohibiting pasture reductions, regulating carbon and acidity contents and using measures to combat erosion. Additionally, Flanders takes a number of other actions to further reduce CH ₄ and N ₂ O emissions. Flanders will focus on further research and implementation of nutritional strategies, the composition of feed, good manure management practices, awareness-raising and (the provision of) information. Flanders will also work towards the small-scale anaerobic fermentation of pure manure by giving financial support for small-scale fermenters.	2004	Administrations of agriculture		NE
AG-C01: Limiting deforestation and promoting reforestation*	Agriculture, Forestry/LULUC F	CO ₂	Afforestation and reforestation	Economic	Implemented	Limiting deforestation and encouraging reforestation	2004	Brussels: IBGE Other regions: relevant administrations in collaboration with AwAC (Wallonia) or LNE (Flanders)		NE

Table 3

SE-B06: Guidance on rational energy use in adults associations*	Cross-cutting	CO ₂	Awareness raising/information	Information	Implemented	NME for adults (associations)	2004	Flanders: LNE		Impact included in EC-B01
SE-B07: Promotion and financial support for energy audits in individual dwellings*	Cross-cutting	CO ₂	Awareness raising/information	Economic	Implemented	Promotion and financial support for energy audits in dwellings	2004	Brussels: ABEA Wallonia : DGO4 Energy		Impact included in EC-B01
SE-B08: Energy counsellors *	Cross-cutting	CO ₂	Awareness raising/information	Information	Implemented	Availability of energy advisors	2004	Brussels: ABEA		Impact included in EC-B01
SE-B09: Eco-construction*	Cross-cutting	CO ₂	Awareness raising/information	Other (Planning)	Implemented	Ecobuild	2004	Brussels: IBGE		Impact included in EC-B01
SE-C01: Training of energy and building professionals*	Cross-cutting	CO ₂	Awareness raising/information	Education	Implemented	Training of professionals	2004	Brussels: IBGE		Impact included in EC-B01
SE-C02: Eco-efficiency scans*	Cross-cutting	CO ₂	Awareness raising/information	Economic	Implemented	Investments in eco-efficiency of SMEs: improve energy efficiency by designing environmentally friendlier products, adapting production processes and better valorising wastes; examining markets to try to adapt to customers' demands and demonstrating benefits of changes (e.g. profitability and better respect of environment)	2004	Regional energy efficiency departments		Impact included in IP-A02
SE-C03: Raise awareness about the reduction of F-gasses in the refrigeration sector*	Cross-cutting	HFCs	Awareness raising/information	Information	Implemented	Increase specific awareness about cooling needs and solutions through providing information about the relevant legislation and ways to reduce emissions	2004	Flemish Region: LNE Brussels Region: IBGE/BIM Walloon Region: AwAC		NE
SE-C04: Social responsibility of businesses*	Cross-cutting	CO ₂	Awareness raising/information	Information	Implemented	Social responsibility of enterprises	2004			NE
SE-C05: Eco-dynamic label for businesses*	Cross-cutting	CO ₂	Awareness raising/information	Information	Implemented	The eco-dynamic enterprise label	2004	Brussels: IBGE		NE
SE-D01: Clean vehicles promotion campaign*	Transport	CO ₂	Awareness raising/information	Information	Implemented	Promoting the purchase of clean vehicles	2004	Brussels: IBGE		Impact included in TR-C01 and TR-C02
SE-D02: Eco-driving promotion campaign*	Transport	CO ₂	Awareness raising/information	Information	Implemented	Awareness raising campaign on eco-driving	2004	Brussels: IBGE Flanders: LNE, MOW		Impact included in TR-B05
SE-D03: Meeting on sustainable mobility needs campaign*	Transport	CO ₂	Awareness raising/information	Information	Implemented	Raise awareness of citizens to satisfy their mobility needs in a sustainable way	2004	Brussels: IBGE Flanders: LNE, MOW		NE

Table 3

Progress in achievement of the quantified economy-wide emission reduction target: information on mitigation actions and their effects

Name of mitigation action ^a	Sector(s) affected ^b	GHG(s) affected	Objective and/or activity affected	Type of instrument ^c	Status of implementation ^d	Brief description ^e	Start year of implementation	Implementing entity or entities	Estimate of mitigation impact (not cumulative, in kt CO ₂ eq)	
SE-E01: Knowledge Centre on energy for agriculture and horticulture*	Agriculture, Forestry/LULUC F	CO ₂	Awareness raising/information	Education	Implemented	Establishment and supporting of an energy centre for agriculture and horticulture	2004	Flanders: LV		NE
SE-E02 : Environmental accounting/reporting	Cross-cutting	CO ₂ , CH ₄ , N ₂ O	Awareness raising/information	Information	Implemented	Encourage the use of environmental accounting/reporting	2004	Flanders: LV		NE
SE-E03: Consumer behaviour and improved sustainability of the entire chain*	Cross-cutting	CO ₂ , CH ₄ , N ₂ O	Awareness raising/information framework policy	Other (Voluntary Agreement)	Implemented	Various plans and strategies focus on consumer behaviour - which can have a major, indirect impact on the climate by making particular choices for food - and on improving the sustainability of the entire food chain. These include the Short Supply Chain Strategic Plan, the Organic Agriculture Strategic Plan, awareness-raising for a more sustainable diet and various projects designed to counter food loss and waste, and to maximise the use of biowaste and organic by-products.	2008	Flanders: LV, LNE, Interdepartmental working group on food loss		NE
OB-A01 : Sustainable public procurement*	Cross-cutting	CO ₂	Awareness raising/information	Economic	Implemented	Sustainable public procurement	2004	FED: pilot : Sustainable Development PPS (Federal Public Planning Services) --> all the federal services should implement this action Brussels: Public bodies		NE
OB-A02 : Sustainable criteria for community catering*	Cross-cutting	CO ₂	Awareness raising/information	Economic	Implemented	Optimisation of catering on the basis of sustainability criteria	2008	FED: Sustainable Development PPS (Federal Public Planning Services)		NE
OB-A03 : Environmental management system*	Cross-cutting	CO ₂	Awareness raising/information	Other (Planning)	Implemented	Establishment of an environmental management system	2004	FED: coordinator : Sustainable Development PPS (Federal Public Planning Services) --> all the federal services should implement the system Brussels: Public bodies		7.3

Table 3

Name of mitigation action ^a	Sector(s) affected ^b	GHG(s) affected	Objective and/or activity affected	Type of instrument ^c	Status of implementation ^d	Brief description ^e	Start year of implementation	Implementing entity or entities	Estimate of mitigation impact (not cumulative, in kt CO ₂ eq)	
OB-C05: Eco-driving training in public services*	Transport	CO ₂	Improved behaviour	Education	Implemented	Eco-driving training in public services	2004	Brussels: STIB		Impact included in TR-B05
OB-C06: Offsetting air travel GHG emissions in public administrations*	Transport	CO ₂	Improved behaviour	Economic	Implemented	Offsetting CO ₂ emissions for air transport. Applied at federal level	2004	FED: Health, Food Chain Safety and Environment FPS - SE B&CG LOG Brussels: Public bodies		NE
OB-C07: Purchase of clean vehicles by public administrations*	Transport	CO ₂	Efficiency improvement of vehicles	Economic	Implemented	Purchase of clean vehicles by public administrations	2004	FED: Personnel and Organisation FPS --> use by all FPSs Wallonia Brussels: Public bodies, STIB		Impact included in TR-C01
Flexibility mechanisms*	Cross-cutting	CO ₂ , CH ₄ , N ₂ O, HFCs, PFCs	Framework policy	Economic	Implemented	Purchase flexibility mechanisms during the Kyoto period to reduce emission levels. Federal State: buys emission rights up to 12.2 million tons of CO ₂ equivalent during the period 2008-2012 through an annual fund of 25 million euro Flemish Region: 17 Mt CO ₂ -eq in the Kyoto period (2008-2012) Brussels Capital Region: 0.155 Mt Walloon Region: 0.087 Mt	2004	FED: Health, Food Chain Safety and Environment FPS - DG Environment Brussels: IBGE		NE
Ecocheques*	Cross-cutting	CO ₂	Sensitisation/information	Economic	Implemented	Cheques as part of employee pay, intended to finance the acquisition of ecological goods and services. These cheques are exempt from taxes and social contributions.	2009	National Labour Council		58.00
Green loans*	Energy	CO ₂	Efficiency improvements of buildings	Economic	Implemented	A temporary measure, only applicable to loans awarded between 1 January 2009 and 31 December 2011.	2009	FED: Finance FPS		161.00

Note : The two final columns specify the year identified by the Party for estimating impacts (based on the status of the measure and whether an ex post or ex ante estimation is available).

Abbreviations : GHG = greenhouse gas; LULUCF = land use, land-use change and forestry.

^a Parties should use an asterisk (*) to indicate that a mitigation action is included in the 'with measures' projection.

^b To the extent possible, the following sectors should be used: energy, transport, industry/industrial processes, agriculture, forestry/LULUCF, waste management/waste, other sectors, cross-cutting, as appropriate.

^c To the extent possible, the following types of instrument should be used: economic, fiscal, voluntary agreement, regulatory, information, education, research, other.

^d To the extent possible, the following descriptive terms should be used to report on the status of implementation: implemented, adopted, planned.

Table 3

2014						

Abbreviation : GHG = greenhouse gas, LULUCF = land use, land-use change and forestry.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b For the base year, information reported on the emission reduction target shall include the following: (a) total GHG emissions, excluding emissions and removals from the LULUCF sector; (b) emissions and/or removals from the LULUCF sector based on the accounting approach applied taking into consideration any relevant decisions of the Conference of the Parties and the activities and/or land that will be accounted for; (c) total GHG emissions, including emissions and removals from the LULUCF sector. For each reported year, information reported on progress made towards the emission reduction targets shall include, in addition to the information noted in paragraphs 9(a–c) of the UNFCCC biennial reporting guidelines for developed country Parties, information on the use of units from market-based mechanisms.

^c Parties may add additional rows for years other than those specified below.

^d Information in this column should be consistent with the information reported in table 4(a)I or 4(a)II, as appropriate. The Parties for which all relevant information on the LULUCF contribution is reported in table 1 of this common tabular format can refer to table 1.

Abbreviations : CRF = common reporting format, LULUCF = land use, land-use change and forestry.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b Developed country Parties with a quantified economy-wide emission reduction target as communicated to the secretariat and contained in document FCCC/SB/2011/INF.1/Rev.1 or any update to that document, that are Parties to the Kyoto Protocol, may use table 4(a)II for reporting of accounting quantities if LULUCF is contributing to the attainment of that target.

^c Parties can include references to the relevant parts of the national inventory report, where accounting methodologies regarding LULUCF are further described in the documentation box or in the biennial reports.

^d Net emissions and removals in the Party's base year, as established by decision 9/CP.2.

^e All values are reported in the information table on accounting for activities under Article 3, paragraphs 3 and 4, of the Kyoto Protocol, of the CRF for the relevant inventory year as reported in the current submission and are automatically entered in this table.

^f Additional columns for relevant years should be added, if applicable.

^g Cumulative net emissions and removals for all years of the commitment period reported in the current submission.

^h The values in the cells "3.3 offset" and "Forest management cap" are absolute values.

ⁱ The accounting quantity is the total quantity of units to be added to or subtracted from a Party's assigned amount for a particular activity in accordance with the provisions of Article 7, paragraph 4, of the Kyoto Protocol.

^j In accordance with paragraph 4 of the annex to decision 16/CMP.1, debits resulting from harvesting during the first commitment period following afforestation and reforestation since 1990 shall not be greater than the credits accounted for on that unit of land.

^k In accordance with paragraph 10 of the annex to decision 16/CMP.1, for the first commitment period a Party included in Annex I that incurs a net source of emissions under the provisions of Article 3 paragraph 3, may account for anthropogenic greenhouse gas emissions by sources and removals by sinks in areas under forest management under Article 3, paragraph 4, up to a level that is equal to the net source of emissions under the provisions of Article 3, paragraph 3, but not greater than 9.0 megatonnes of carbon times five, if the total anthropogenic greenhouse gas emissions by sources and removals by sinks in the managed forest since 1990 is equal to, or larger than, the net source of emissions incurred under Article 3, paragraph 3.

^l In accordance with paragraph 11 of the annex to decision 16/CMP.1, for the first commitment period of the Kyoto Protocol only, additions to and subtractions from the assigned amount of a Party resulting from Forest management under Article 3, paragraph 4, after the application of paragraph 10 of the annex to decision 16/CMP.1 and resulting from forest management project activities undertaken under Article 6, shall not exceed the value inscribed in the appendix of the annex to decision 16/CMP.1, times five.

	<i>Units from other market-based mechanisms</i>	<i>(number of units)</i>		
		<i>(kt CO₂ eq)</i>		
<i>Total</i>		<i>(number of units)</i>		
		<i>(kt CO₂ eq)</i>		

Abbreviations : AAUs = assigned amount units, CERs = certified emission reductions, ERUs = emission reduction units, ICERs = long-term certified emission reductions, tCERs = temporary certified emission reductions.

Note: 2011 is the latest reporting year.

^a Reporting by a developed country Party on the information specified in the common tabular format does not prejudice the position of other Parties with regard to the treatment of units from market-based mechanisms under the Convention or other market-based mechanisms towards achievement of quantified economy-wide emission reduction targets.

^b For each reported year, information reported on progress made towards the emission reduction target shall include, in addition to the information noted in paragraphs 9(a-c) of the reporting guidelines, on the use of units from market-based mechanisms.

^c Parties may include this information, as appropriate and if relevant to their target.

^d Units surrendered by that Party for that year that have not been previously surrendered by that or any other Party.

^e Additional rows for each market-based mechanism should be added, if applicable.

Custom Footnotes

Since 2013, it has no longer been possible to track the use of flexible mechanisms in the EU ETS directly through information on the EUTL public website: CERs and ERUs are exchanged into EUAs and after the exchange they cannot be further tracked as CERs or ERUs. These exchanges will become public at installation level two years after transfers conducted with this initial information reflecting use in 2013 become available in 2016. The use of flexible mechanisms under the ESD cannot be quantified either at this moment: As the compliance assessment for the first year 2013 under the ESD will only take place in 2016, any potential use of units for 2013 will only take place in 2016. Thus, for the year 2013 no data are currently available to report on.

Abbreviations : GHG = greenhouse gas, LULUCF = land use, land-use change and forestry.

^a In accordance with the "Guidelines for the preparation of national communications by Parties included in Annex I to the Convention, Part II: UNFCCC reporting guidelines on national communications", at a minimum Parties shall report a 'with measures' scenario, and may report 'without measures' and 'with additional measures' scenarios. If a Party chooses to report 'without measures' and/or 'with additional measures' scenarios they are to use tables 6(b) and/or 6(c), respectively. If a Party does not choose to report 'without measures' or 'with additional measures' scenarios then it should not include tables 6(b) or 6(c) in the biennial report.

Information on updated greenhouse gas projections under a ‘with measures’ scenario^a

	<i>GHG emissions and removals^b</i>							GHG emission projections	
	<i>(kt CO₂ eq)</i>							<i>(kt CO₂ eq)</i>	
	<i>Base year (1990)</i>	1990	1995	2000	2005	2010	2013	2020	2030

^b Emissions and removals reported in these columns should be as reported in the latest GHG inventory and consistent with the emissions and removals reported in the table on GHG emissions and trends provided in this biennial report. Where the sectoral breakdown differs from that reported in the GHG inventory Parties should explain in their biennial report how the inventory sectors relate to the sectors reported in this table.

^c 20XX is the reporting due-date year (i.e. 2014 for the first biennial report).

^d In accordance with paragraph 34 of the “Guidelines for the preparation of national communications by Parties included in Annex I to the Convention, Part II: UNFCCC reporting guidelines on national communications”, projections shall be presented on a sectoral basis, to the extent possible, using the same sectoral categories used in the policies and measures section. This table should follow, to the extent possible, the same sectoral categories as those listed in paragraph 17 of those guidelines, namely, to the extent appropriate, the following sectors should be considered: energy, transport, industry, agriculture, forestry and waste management.

^e To the extent possible, the following sectors should be used: energy, transport, industry/industrial processes, agriculture, forestry/LULUCF, waste management/waste, other sectors (i.e. cross-cutting), as appropriate.

^f Parties may choose to report total emissions with or without LULUCF, as appropriate.

^a Parties should fill in a separate table for each year, namely 2011 and 2012, where 2014 is the reporting year.

^b Parties should report, to the extent possible, on details contained in this table.

^c Parties should explain, in their biennial reports, the methodologies used to specify the funds as provided, committed and/or pledged. Parties will provide the information for as many status categories as appropriate in the following order of priority: provided, committed, pledged.

^d Parties may select several applicable sectors. Parties may report sectoral distribution, as applicable, under "Other".

^e Parties should report, as appropriate, on project details and the implementing agency.

^f Parties should explain in their biennial reports how they define funds as being climate-specific.

^g Please specify.

^h Cross-cutting type of support refers to funding for activities which are cross-cutting across mitigation and adaptation.

Custom Footnotes

Due to technical problems (the BR CTF does not allow to introduce more than 300 rows), data in CTF table 7b have been aggregated. For further information, please refer to table 7b in the Biennial Report.

^a Parties should fill in a separate table for each year, namely 2011 and 2012, where 2014 is the reporting year.

^b Parties should report, to the extent possible, on details contained in this table.

^c Parties should explain, in their biennial reports, the methodologies used to specify the funds as provided, committed and/or pledged. Parties will provide the information for as many status categories as appropriate in the following order of priority: provided, committed, pledged.

^d Parties may select several applicable sectors. Parties may report sectoral distribution, as applicable, under "Other".

^e Parties should report, as appropriate, on project details and the implementing agency.

^f Parties should explain in their biennial reports how they define funds as being climate-specific.

^g Please specify.

^h Cross-cutting type of support refers to funding for activities which are cross-cutting across mitigation and adaptation.

Custom Footnotes

Due to technical problems (the BR CTF does not allow to introduce more than 300 rows), data in CTF table 7b have been aggregated. For further information, please refer to table 7b in the Biennial Report.

BEL_BR2_v1.0

Provision of technology development and transfer support^{a,b}

<i>Recipient country and/or region</i>	<i>Targeted area</i>	<i>Measures and activities related to technology transfer</i>	<i>Sector^c</i>	<i>Source of the funding for technology transfer</i>	<i>Activities undertaken by</i>	<i>Status</i>	<i>Additional information^d</i>
Viet Nam	Mitigation and Adaptation	Support through Vietnam's Green Growth Strategy Facility (GGSF): pilot activities will be set up in the three provinces where the Belgian Development Cooperation is active in the field green growth and climate change (evidence based planning).	Other (multisectoral)	Public	Private and Public	Implemented	The Facility will develop a call for proposals mechanism to select, in a bottom-up way, actions for funding in the field of green growth.
Palestina	Adaptation	This adaptation project started in July 2013 and builds on innovative practices to improve the learning condition of Palestinian children in Hebron. By improving the eco-design of the schools and harnessing geothermic and solar energy to make them cooler in summer and warmer in winter, this project improves the resilience of Palestinian schools and allows them to remain open all year long.	Other (Education)	Public	Public	Implemented	
Rwanda	Mitigation	Hydropower plants and solar power for electrification. The Rukarara II is considered the national reference for hydropower plants in Rwanda. It is fully automated and controlled from a distance. The design and technology are state of the art; which gives confidence and guarantee that the plant will last its projected lifespan of at least 30 years.	Energy	Public	Public	Implemented	
Malawi	Mitigation and Adaptation	This support will focus on two key thematic areas: Improving climate change community resilience through agricultural production-adoption of climate smart agricultural principles; and Enhancing climate change mitigation interventions through proper waste management and pollution control practices. Both these interventions are identified in the Climate Change Investment Plan. Activities related to technology transfer: 1.1 Promote water harvesting technologies for agricultural production in selected areas 1.3 Support small scale irrigation systems in selected areas 2.1 Promote Solid waste recycling technologies 2.3 Support one model solid waste management facility	Other (other)	Public	Public	Implemented	https://drive.google.com/file/d/0B-IUzKYaN-QSMnJvbjNjU2Q0OEK/edit?usp=sharing
Malawi, Mozambique, Namibia	Mitigation	The SEED initiatief is a global partnership focussing on sustainable development and the "greening" of the economy. It supports innovative en locally nurtured initiatives or enterprises which embrace social and environmental elements in their business model. Outcomes related to technology transfer: Result 1: Social and environmental entrepreneurship in Malawi, Mozambique and Namibia promoted Result 2: Micro and small social and environmental enterprises (SEED Winners) in Malawi, Mozambique and Namibia grow as a result of additional financial support Result 3: Investment opportunities for SEED Winners in Malawi, Mozambique and Namibia created Result 4: Capacity of local institutions to support low carbon entrepreneurship in Malawi, Mozambique and Namibia built Result 5: Capacity of local entrepreneurs to contribute to the Green Economy in Mozambique built	Industry	Public	Public	Implemented	https://drive.google.com/file/d/0B-IUzKYaN-QSTFd1dURXSjZ6Nlk/edit?usp=sharing

Table 8

Malawi	Mitigation and Adaptation	<p>The AFSP II aims to contribute towards climate-smart agriculture, i.e. agriculture that sustainably increases productivity (food security), resilience (climate change adaptation) and reduces greenhouse gas emissions (mitigation) in Malawi through the scaling-up of agroforestry innovations, namely: (1) Fertilizer trees and conservation agriculture to build an evergreen agriculture that enhances accumulation of soil organic matter thus enhancing crop productivity and resilience to climatic risks; (2) Fruit trees – to improve household nutrition, health and income; (3) Fodder trees – to improve milk yields for smallholder dairy farmers to enhance nutrition, health and income; and (4) Woodlots – for firewood and timber production. However, as firewood is a major by-product of the fertilizer tree systems, the promotion of fuel wood species as a stand-alone activity will be. The purpose of the AFSP II is to use effective partnership to increase food and nutrition security, income and livelihoods of resource-constrained smallholder farmers in Malawi. The expected impacts of the project are to: (1) improve food security, nutrition, income and livelihoods of smallholder farmers and (2) increase resilience of the farm environment. The project will produce four outcomes: 1. Tree germplasm suppliers produce quality tree seeds and seedlings for farmers; 2. At least 100 extension staff use improved methods to match tree options to sites and farmer situations; 3. Research services generate and share information on what tree options work best in different circumstances; 4. Policy makers formulate and implement appropriate policies to mainstream agroforestry nationally. The project aims to produce the following outputs: 1. Options for quality tree seed and seedling supply appropriate to different circumstances developed and quality tree germplasm made available to suppliers. 2. Capacity and skills of extension staff and farmers strengthened, and agroforestry widely practised 3. Impact of tree promotion on livelihoods and environment measured 4. Guidelines for the development of a coherent agroforestry policy established. This cooperation between the government of Flanders and the World Agroforestry Centre contributed to the scientific knowledge about fertilizer trees and their benefits towards climate change (GW Sileshi, Chitedze e.a.; Agroforestry: Fertilizer Trees; In boek: Encyclopedia of Agriculture and Food Systems, Publisher: Elsevier, Editors: Neal Van Alfen, p.222-234, online available at http://www.researchgate.net/publication/264789099_Agroforestry_Fertilizer_Trees)</p>	Agriculture	Public	Public	Implemented	https://drive.google.com/file/d/0B-IUzKYaN-QSULpsS19iVzNmTDA/edit?usp=sharing

<i>Recipient country and/or region</i>	<i>Targeted area</i>	<i>Measures and activities related to technology transfer</i>	<i>Sector^c</i>	<i>Source of the funding for technology transfer</i>	<i>Activities undertaken by</i>	<i>Status</i>	<i>Additional information^d</i>
South Africa	Mitigation and Adaptation	South Africa agrarian sector is affected by a context of far-reaching and fundamental change, related to the country's land and agrarian transformations, in a context of overall deregulation of its economy. Moreover, the country is characterised by the lack of publicly available precise data and analyses and the weak involvement by stakeholders in decision-making regarding land and agrarian transformation. On top of that, the increased interconnectivity of the land and agrarian questions in South Africa, Africa and the world, leads to the necessity of apprehending them within today's global context of agrarian, environmental, and food security questions. These observations call for the establishment and development of a well-coordinated information, data, analysis and evidence-based decision-making support entity, grouping the major academic and analytical players on one hand, and a broader stakeholder panel on the other hand, aiming at producing and making available data, information and analyses, and supporting evidence-based and inclusive decision-making processes with regards land and land-based activities in South Africa. The SA Observatory's goal is to promote evidence-based and inclusive decision-making over land resources in South Africa and beyond by generating, analysing and making available land-based information and by widening participation to all stakeholders. Sustainable land management is relevant to climate change policy in South Africa. mainly African countries	Adaptation	Flemish Partnership Water for Development– Vlaams Partnerschap Water voor Ontwikkeling (VPWvO) The Flemish Partnership Water for Development (VPWvO) was launched on 22 March 2004, bringing together Flemish actors in the field of water: NGOs, public water companies, private companies, research and educational institutions, local and provincial governments. Through this platform, Flanders aims to contribute to MDG7c, providing safe drinking water, improved hygiene conditions and adequate sanitation in developing countries through sustainable water and sanitation projects. For a Flemish Partnership project to be approved for co-financing by the government of Flanders, at least two Flemish partners and at least one local partner must cooperate and contribute to the project. Flemish actors can contribute financially, in the form of technical expertise, or in a combination of both. These partnerships create synergies and a healthy exchange of knowledge and expertise, for the benefit of all involved. Appropriate tools and technology are chosen, taking into account the capacity of the beneficiaries. Examples can be given in the field of sanitary infrastructure, drinking water installations, solar energy, drinking water quality, etc. Every project contains also a capacity building component to guide and coach the stakeholders to use the tools and technology, to maintain the installations and to transfer the infrastructure and good practices to the stakeholders. Table 9

BEL_BR2_v1.0

Provision of capacity-building support^a

<i>Recipient country/region</i>	<i>Targeted area</i>	<i>Programme or project title</i>	<i>Description of programme or project^{b,c}</i>
Viet Nam	Adaptation	Strengthening the capacity within Vietnam for the assessment and management of water resources as a basis for rural water supply for poverty reduction (Supp. to MONRE/departm. For Water Resource Managing)	<p>Specific Objectives: To build capacity and enhance MoNRE, particularly the DWRM, and provincial effectiveness.</p> <p>Improvements in the understanding and practical application of Integrated Water Resources Management concepts and approaches in a Vietnamese context;</p> <p>Improvement in the management of regional water resources at national, provincial and district levels, for the sustainable development and use of surface water and groundwater for poverty reduction;</p> <p>A framework for the strategic planning of the extraction, use and protection of water resources identified as having potential for poverty reduction;</p> <p>Improvement of water resource assessment capacity of staff working in the DONRE's of targeted provinces and in the DWRM;</p> <p>Improved understanding of the aquifer systems and thus groundwater resources in provinces and their potential to assist in poverty reduction;</p> <p>Greater understanding of the impacts of sanitation options on water sources used for other purposes, including water supply, and how to best deal with these;</p> <p>A capacity building strategy for the national, provincial and district levels;</p> <p>Strengthened inter-Ministerial, interdepartmental and inter sectoral communication, consultation and cooperation;</p> <p>Improvement in people's awareness of water resource protection through IEC programs;</p> <p>Processes and systems established for regional water information gathering and sharing within the Ministry, between Ministries and at provincial and district levels;</p> <p>District water quality monitoring kits operating;</p> <p>Multi-piezometers placed in coastal aquifers; and</p> <p>Upgrading the existing water resource monitoring network of MONRE and the provinces.</p>
Viet Nam	Multiple Areas	Green Growth Strategy Facility	<p>1. A facility to support the implementation of Viet Nam's Green Growth Strategy is created and developed. This result includes the development of the Facility including all its operational rules and procedures as well as management structure, its subsequent improvement through monitoring and evaluation during the implementation of the calls for proposals; 2. Green growth capacity & MPI leadership increased: general capacity building for MPI and the ministries in the Green Growth Coordination Committee is foreseen. For MPI, the project will support capacity building processes and activities to increase its leadership and coordination role in the field of implementing the strategy; 3. Piloting activities in three provinces are supported. The 3 provinces where the Belgian bilateral cooperation is active in the field of climate change are supported in the field of Green Growth; 4. The Facility supports, through a call for proposals, green growth interventions throughout the country; 5. Good practices disseminated and replicated: identification, dissemination and replication of existing good/best intervention practices are completed. This result is primarily aimed at harvesting the low hanging investment opportunities (win-win solutions that are both economically and environmentally sound) and ensuring their widest possible dissemination and replication.</p>
Peru	Adaptation	Climate-resilient biodiversity conservation in Peru (PRODERN)	<p>This adaptation project started in April 2012 and promotes the strategic management of natural resources by strengthening the capacities of local governments and communities, especially those living in poverty and extreme poverty, in five regions of Peru, Apurimac, Ayacucho, Huancavelica, Junin and Pasco. By helping local and regional governments maintain traditional water management practices, restore ecosystems and protect biodiversity, this project supports local populations in confronting the challenge of climate change and in providing food security in the Peruvian Andes.</p>

Provision of capacity-building support^a

<i>Recipient country/region</i>	<i>Targeted area</i>	<i>Programme or project title</i>	<i>Description of programme or project^{b,c}</i>
Uganda	Mitigation	Clean Development Mechanism (CDM) Capacity Development Project	To strengthen technical capacity on CDM project formulation and create awareness of investment opportunities under the CDM among governmental institutions, project developers, including project-financing institutions.
Latin America and the Caribbean	Adaptation	UNESCO: Managing Water Resources in Arid and Semi-Arid regions of Latin America and Caribbean (MWAR-LAC)	<p>The overall goal of the project is to contribute to improving the quality of life and alleviating the poverty of local communities in arid and semi-arid environments in Latin America and the Caribbean, through a reduction in the vulnerability of water resources systems to global changes based on sound scientific knowledge.</p> <p>The proposal has three main thematic priorities</p> <p>a) Improved water governance as a basis to attain integrated water resources management,</p> <p>b) use of modern techniques and methodologies to assess and improve water use efficiency;</p> <p>c) hydro-climatic risk management including decision making</p> <p>Project goals</p> <p>a) Integrated water management (Water Governance):</p> <ul style="list-style-type: none"> • Objective: to encourage actions aimed at increasing water governance in pilot areas; <p>b) Climate risk management:</p> <ul style="list-style-type: none"> • Objective: to encourage the inclusion of climate information in water management; <p>c) Water supply increase and efficient use of water:</p> <ul style="list-style-type: none"> • Objective: support the adoption of systems aimed at assessing and increasing water supply; <p>Outcomes:</p> <ol style="list-style-type: none"> 1. Improved water governance in the pilot areas; 2. Hydro-climate information systems included in water management in the basins located in the pilot areas; 3. Increasing knowledge on water use efficiency in basins and building capacities to evaluate and adopt water efficient use methods and techniques.
Mexico, Turkey, China	Multiple Areas	International Labour Organisation (ILO): Decent Work in the Green Economy	<p>Development objective:</p> <p>In all, the project's goal is to contribute to the creation of green jobs for women and men in sustainable enterprises as a means to poverty reduction and social inclusion and strengthen national initiatives for just transitions to a green economy.</p> <p>Outcomes:</p> <p>I. Improved ability of governments' and social partners' in Mexico and Turkey to assess the scope for green jobs and to formulate, monitor and review relevant gender-sensitive policies and programmes.</p> <ol style="list-style-type: none"> 1. National stakeholders received training on issues related to decent work in the green economy 2. National stakeholder and key partners have access to knowledge and evidence on sectors with green jobs potential and challenges and opportunities for decent work creation and sustainable enterprises in the transition to a green economy 3. National constituents have developed and submitted national strategies for the promotion of decent work in a transition to the green economy <p>II. Improved ability and commitment of stakeholders in China to formulate and implement skills for green jobs development strategies</p> <ol style="list-style-type: none"> 1. Pilot training workshops on skills for green jobs have been conducted in selected areas 2. Constituents have developed policy recommendations for a skills for green jobs strategy in the energy efficient building sector of the Jiangsu province <p>III. An expanded knowledge base on green jobs is accessible for ILO constituents and relevant international organizations for use in gender sensitive policy and programme development</p> <ol style="list-style-type: none"> 1. ILO constituents and ILO staff have access to knowledge and knowledge sharing facilities on green jobs (webpage, networks, documentation of experiences) 2. ILO constituents have access to global reports on green jobs

Provision of capacity-building support^a

<i>Recipient country/region</i>	<i>Targeted area</i>	<i>Programme or project title</i>	<i>Description of programme or project^{b,c}</i>
Malawi	Multiple Areas	World Agroforestry Centre (ICRAF): Community Agroforestry Tree Seeds Banks (CATS Banks): Building Agroforestry Scaling up Platform for Diversifying Livelihoods	<p>The project's primary objectives are to:</p> <ul style="list-style-type: none"> i) Apply a suite of agroforestry interventions for generating multiple streams of livelihood impact for smallholder farmers; ii) Apply the CATS Bank approach for building stronger platform for wider farmer testing, and out-scaling of proven agroforestry portfolios customized for use by development agencies in pilot sites; iii) Building capacity of communities in nursery production, tree establishment and management, and facilitating community groups on CATS Banks in the pilot sites. <p>outcomes:</p> <ul style="list-style-type: none"> i) Scaling up platform built generating multiple streams of impact from a range of integrated agroforestry portfolios and multipurpose tree interventions developed and tested (scaling up). ii) A framework for sustainable supply and diffusion of tree germplasm developed, and pilot experiences documented and lessons learnt disseminated to policy makers and development agencies (Germplasm); iii) Capacity of farmers and development partners in CATS Banks model and tree management built for achieving large-scale agroforestry impacts on climate change, land restoration and livelihood security (Capacity).
multiple	Adaptation	IFAD: Support to the Adaptation for Smallholder Agriculture Programme	<p>The Adaptation for Smallholder Agriculture Programme (ASAP) was launched by the International Fund for Agricultural Development (IFAD) in 2012 to make climate and environmental finance work for smallholder farmers. A multi-year and multi-donor financing window, ASAP provides a new source of cofinancing to scale up and integrate climate change adaptation across IFAD's approximately US\$1 billion per year of new investments. The programme is joined up with IFAD's regular investment processes and benefits from rigorous quality control and supervision systems.</p> <p>ASAP is driving a major scaling up of successful 'multiple-benefit' approaches to smallholder agriculture, which improve production while reducing and diversifying climate-related risks. In doing so, ASAP is blending tried-and-tested approaches to rural development with relevant adaptation know-how and technologies. This will increase the capacity of at least 8 million smallholder farmers to expand their livelihood options in an uncertain and rapidly changing environment.</p>

Provision of capacity-building support^a

<i>Recipient country/region</i>	<i>Targeted area</i>	<i>Programme or project title</i>	<i>Description of programme or project^{b,c}</i>
Africa, Asia & LAC	Adaptation	UNESCO: Addressing Water Security': Climate Impacts and adaptation responses in AFRICA, ASIA AND LAC (WATER SECURITY).	<p>UNESCO- IHP is the only United Nations specialized agency with a specific mandate to promote water science, continues to play a pivotal role, in assisting and guiding Member States in water-related scientific, conservation, protection, managerial and policy issues. IHP has evolved from an internationally coordinated hydrological research programme into an all encompassing, holistic programme whose aim is to facilitate education and capacity-building, as well as enhance water resources management and governance.</p> <p>The project aims at implementing activities focusing on developing adaptation strategies in order to contribute to achieve water security impacted by climate change particularly focusing vulnerable regions such as mountains and arid and semi-arid regions.</p> <p>The specific objectives of the project proposal are to:</p> <ol style="list-style-type: none"> 1. Develop a set of benchmarks on vulnerabilities and adaptive capacities in the context of Climate change, particularly for the mountainous regions, based on the case studies of the IHP projects (MWAR-LAC and Andean Glacier); 2. Generate evidence-based knowledge for adaptation strategies to address water security; 3. Raise awareness and enhance capacities to assess, monitor and communicate the impacts of and responses to climate change on natural and socio-economic environments at local, national and regional level; 4. Develop strategies and policy guidelines considering vulnerabilities, opportunities and potentials for adaptation, with particular reference to strengthening the role of local communities; 5. Facilitate, strengthen and develop coordination with the on-going research activities in the different regions; 6. Provide a global forum to discuss key findings from regional workshops and initiatives in order to develop a worldwide statement on climate change adaptation in mountainous regions; 7. Generate and share information and knowledge about the environment in mountain societies, promote a policy dialogue with local stakeholders, national governments and regional bodies, and strengthen human and institutional capital to promote the training of new leaders in order to contribute to sustainable development of water resources impacted by Climate Change.
South Africa	Adaptation	UNESCO: Framework for Research, Education and Training in the Water Sector Phase III (FET -Water III)	<p>FETWATER aims developing and transferring knowledge so that the critical mass of water scientists is created and maintained, and facilitate the process of the implementation of the Act. The creation of knowledge and its transfer is conducted via small training networks, which are composed of the leading individuals and Institutions in the country at each thematic area.</p> <p>The expected outcome for FETWater Phase III will be to strengthen the capacity of the South African water sector in integrated water resources management through networking.</p> <p>The expected outputs are:</p> <ul style="list-style-type: none"> • The creation of new networks and/or the expansion of existing networks related to integrated water resource management. • Exposure of at least 1500 South Africans and 100 SADC participants to the principles and practice of various aspects of integrated water resources management via these networks.

Provision of capacity-building support^a

<i>Recipient country/region</i>	<i>Targeted area</i>	<i>Programme or project title</i>	<i>Description of programme or project^{b,c}</i>
multiple countries	Multiple Areas	UNDP: Strengthening Capacity to Incorporate Climate Change Adaptation and Resilience Planning into National Biodiversity Strategies and Action Plans (NBSAPs) through the NBSAP Forum	The National Biodiversity Strategies and Action Plans (NBSAPs) are being updated to incorporate the Aichi Targets and to fulfill other related obligations before the Convention of Biological Diversity (CBD). However, many countries count on uneven levels of technical support for the task, in spite of current and growing demand for it. With the funds provided by UNDP will develop guidance material on incorporating climate resilience and adaptation into NBSAPs and their implementation, and through the NBSAP Forum, will make the guidance universally available in multiple languages. To develop the guidance, UNDP will work with leading countries, CBD, UNEP and other partners, to identify, consolidate and document existing best practices. UNDP will develop a practical toolkit, available in multiple languages. In addition, it will hold on-line information and training sessions. Three sets of results are expected: (1) Best practices in incorporating climate change resilience and adaptation into national biodiversity and development planning are clearly identified globally; (2) At least 30 countries receive targeted support on how to use the climate resilience-NBSAP guide; and (3) Climate guide is widely shared to all CBD Parties.
Burkina Faso, Democratic Republic of the Congo, Mali	Adaptation	Strengthening of local Red Cross divisions for disaster prevention and risk reduction	Program has a component for Capacity Building for Disaster Risk Reduction
Uganda	Adaptation	Agricultural Adaptation to Climate Change in the Central Cattle Corridor in Uganda	Activities include strengthening the institutional capacity of the Climate Change Department (CCD) of the Ministry of Water and Environment; increasing climate change awareness, knowledge and capacities in selected departments and the target districts; and producing and disseminating adaptation good practices and their integration in relevant policies and plans.
Francophone African countries	Multiple Areas	Cluster francophone of the International Partnership on Mitigation and MRV	Capacity-building initiatives targeting francophone developing countries (mainly African countries); focus on GHG inventories, and also covering NAMAs/INDCs
Rwanda	Mitigation	Climate Finance in Rwanda - Identifying and prioritizing appropriate mitigation actions and interventions in the charcoal production sector ⁷	On October 7th, 2014 the Rwanda Natural Resources Authority and the Belgian Federal Directorate-General for the Environment organised the workshop 'Sustainable Charcoal Production and the Potential Role of Climate Financing – Identifying and Prioritizing Appropriate Actions and Interventions'. The workshop aimed at: introducing participants to climate financing in general and giving them an overview of the current status in Rwanda; presenting the initial findings from a study on the charcoal production sector carried out by CAMCO/Climate Care; discussing the appropriateness and feasibility of the actions and interventions that have been identified; prioritising the actions and interventions and providing guidance for the further work of Camco/Climate Care. 87 stakeholders (tree growers, charcoal producers, transporters and and wholesalers/retailers) and representatives from national and local governments, NGOs, the private sector and the donor community actively participated in the workshop.

Provision of capacity-building support^a

<i>Recipient country/region</i>	<i>Targeted area</i>	<i>Programme or project title</i>	<i>Description of programme or project^{b,c}</i>
Mozambique	Mitigation	Climate Finance in Mozambique - Identifying and prioritizing appropriate mitigation actions and interventions in the municipal waste and charcoal production sectors'	On February 18th, 2014 the Mozambican Ministério para a Coordenação da Acção Ambiental (MICOA) and the Belgian Federal Directorate-General for the Environment organised the workshop 'Climate Finance in Mozambique - Identifying and prioritizing appropriate mitigation actions and interventions in the municipal waste and charcoal production sectors'. The objective of the workshop were to: introduce participants to climate finance opportunities in general and to give them an overview of the current status in Mozambique; present the initial findings from studies carried out by Carbon Africa/AMOR and Energy Engineering Solutions/Green Light in the municipal waste and charcoal production sectors, respectively; discuss the appropriateness and feasibility of the mitigation actions and interventions that have been identified; prioritise the actions and interventions and provide guidance for the further work by Carbon Africa/AMOR and Energy Engineering Solutions/Green Light respectively. 80 stakeholders and representatives from national and municipal governments, NGO's, private sector and the donor community actively participated in the workshop.

^a To be reported to the extent possible.

^b Each Party included in Annex II to the Convention shall provide information, to the extent possible, on how it has provided capacity-building support that responds to the existing and emerging capacity-building needs identified by Parties not included in Annex I to the Convention in the areas of mitigation, adaptation and technology development and transfer.

^c Additional information may be provided on, for example, the measure or activity and co-financing arrangements.
